Feature Guide Business Add-On

Welcome to the feature guide for Business Add-On, the solution that empowers SAP users to manage business data smarter, faster, and error-free. Whether it's onboarding new relationships, keeping your master data up-to-date, or integrating critical business information, Business Add-On provides the tools to optimize every step of the process.

With Business Add-On, you unlock the full potential of your data and SAP environment. This guide explores all the features of Business Add-On, how they work, and what they can do for your organization. The result? A more efficient process, reduced risks, and greater data reliability.

Intelligent Onboarding

Does it take too much time to add new relationships to SAP? Business Add-On does it with a single click. The system automatically searches, verifies, and validates all business data, helping you avoid duplicate records and errors in your database.

What you can automate:

Global company search and matching

Automatic verification of bank and VAT details
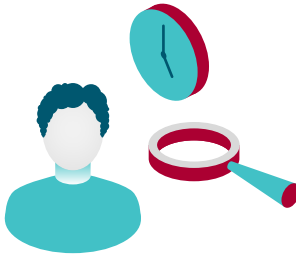

Prevention of duplicate records

Insight into risk data

Bulk import of relationships

Visibility into family structures

Real-Time Relationship Monitoring

Is keeping your master data up-to-date a challenge? Business Add-On monitors your relationships 24/7 and immediately alerts you to relevant changes among customers and suppliers, enabling proactive responses when needed.

Monitored data includes:

Address and contact details

Payment behavior

Compliance status

Risk scores

Credit limits

Bankruptcy scores

Data Integration with SAP

Still working with multiple systems for business information? Business Add-On consolidates all D&B data within your SAP environment. With a single central database, everyone works more efficiently and always with up-to-date information.

What you can automate:

Business profiles and identification

Financial data and ratings

Corporate structures and ownership relationships

Directors and contacts

Compliance and risk status

Chamber of Commerce and VAT numbers

Registered addresses and contact details

Industry and activity information

Company size and revenue indications

Risk and Compliance Checks

Struggling to keep your master data current? Business Add-On continuously monitors your relationships and notifies you of relevant changes, allowing proactive action when necessary.

What's monitored:

Risk scoring and monitoring

Compliance reports

Screening for sanctions, PEPs, and adverse publicity

Document collection based on profiles

Document verification

Conclusion

Business Add-On isn't just an add-on to your SAP system, it's a game-changer for organizations aiming to improve data quality and minimize risks. With automated data verification, real-time monitoring, and seamless integration, you're always prepared for tomorrow's challenges.
